Is Blossom Blight in Macadamias your problem then

**rovral**

Liquid fungicide is your answer

**Stage 1 – Unopened Flowers**  
**Not Susceptible** – Macadamia Blossom Blight (*Botrytis*)

**Stage 2 – Flowering**  
**Susceptible** – Macadamia Blossom Blight (*Botrytis*)

**rovral**

**Stage 3 – Flower Senescence**  
**Very Susceptible** – Macadamia Blossom Blight (*Botrytis*)

**rovral**

**Stage 4 – Early Fruit Set**  
**Not Susceptible**- Macadamia Blossom Blight (*Botrytis*)

Rovral® Liquid is an oil-based formulation. This formulation provides for superior wetting and enhanced rainfastness when compared to water based formulations, making it the preferred option for botrytis control during a wet flowering period.

Disease	State	Rate	WHP	Comments
Bortrytis blight ( <i>Botrytis spp</i> )	NSW QLD	100 mL/100L water Dilute spraying	Nil	Apply as a thorough cover spray to flower racemes when they open. A follow up spray may be needed one week later if wet conditions persist
